PROFILE

Software Engineering student at INSAT with a drive for building things that make a difference. Experienced in full-stack web development, AI/ML projects, and hackathons. Passionate about learning new technologies and applying them to solve real-world problems. Eager to contribute my skills and grow as a developer through impactful internships and projects.

EDUCATION

Engineering Degree in Software Engineering — Institut National des Sciences Appliquées et de Technologie (INSAT) Tunis, Tunisia

EXPERIENCE

Software Engineering Intern — BiatIT **Internship** Tunisia

- Built a full-featured banking platform (BankApp) with Angular frontend and Spring Boot backend.
- Implemented JWT authentication with secure refresh-token rotation and multi-step admin activation workflow.
- Designed multi-card/account management, paginated transaction history, and role-based UI rendering.

Stack: Angular · TypeScript · Spring Boot · Java · MySQL · JWT · JPA/Hibernate · REST API

Analysis Instructor — Learnify

- Delivered structured mathematical analysis lessons focused on rigorous problem-solving techniques.

Hackathon — Trustia (Credit AI Platform)

- Built an end-to-end AI credit evaluation platform using a multi-agent pipeline, Qdrant vector DB, and FastAPI.
- Designed a "Similarity Radar" — visual explainability tool comparing pending cases to historical decisions.

Stack: FastAPI · Angular · TypeScript · Qdrant · Python · AI Agents · Vector DB

Hackathon — Haniny AI (Driver Safety System) **Hack For Good 4.0**

- Designed and built a real-time driver monitoring system using computer vision (drowsiness, phone use, distraction).
- Delivered per-trip behavioral safety reports and in-car alert system within competition timeline.

Stack: Python · OpenCV · Computer Vision · AI/ML · REST API

KEY PROJECTS

DAR.COM — Real Estate Platform **Active**

- Full lifecycle property management: listings, agents, contracts, payments.
- Automated PDF contract generation (QuestPDF) and financial reporting.
- AI roadmap: CV pipeline for building photo analysis, price estimation, chatbot.

Stack: ASP.NET Core 8 · C# · MySQL · Bootstrap 5 · JWT · Entity Framework

BrokerCore AI — Insurance Recommender

- XGBoost recommendation engine with GPT-4o conversational assistant.
- Full MLOps pipeline: training, versioning, drift detection, automated retraining.

VinylShop — E-Commerce Platform

- Full e-commerce store (catalog, cart, checkout, admin) built from scratch in raw PHP.
- Session-based authentication, MVC pattern, fully custom responsive CSS.

Stack: PHP · MySQL · HTML/CSS · JavaScript

TruckLinkTN — Logistics Platform **Active**

- Matches truck drivers with shipments along their return route to cut empty-trip waste.
- Route-matching algorithm, reputation rating, live tracking, in-app messaging.

Stack: Full-Stack Web · REST API · Real-time Features

Stack: Python · FastAPI · XGBoost · GPT-4o · Tailwind · Docker

TECHNICAL SKILLS

Frontend

Angular React TypeScript

HTML/CSS Bootstrap 5

Tailwind CSS

Databases

MySQL MongoDB

Entity Framework JPA/Hibernate

Backend & Languages

Spring Boot ASP.NET Core 8

FastAPI PHP Java C#

Python C/C++

DevOps & Tools

Git / GitHub Docker REST API

Swagger JWT

AI & Data

Computer Vision NLP

LLMs / GPT-4o XGBoost MLOps

Qdrant AI Agents RAG Pipelines

Exploring

Kubernetes AI Agents RAG

LEADERSHIP & ACTIVITIES

Treasurer — AI National Summit

- Managed budgeting, sponsorships, and financial operations for a national AI conference.

Sponsorship Committee — TSYP Congress (IEEE)

- Secured partnerships and managed sponsor relations for the national IEEE congress.

Head of Finance — Interact Sfax Doyen

- Led financial planning and resource allocation for Rotary-affiliated service club events.
